SUMMARY

Junior developer with 8+ months of professional experience building and maintaining enterprise web systems. Specializes in Laravel, CodeIgniter, and JavaScript, with hands-on exposure to legacy system, security implementation, performance optimization, and full-stack feature delivery.

SKILLS

Languages & Frameworks: PHP, JavaScript, React, Laravel, Node.js, CodeIgniter

Tools: Git, MySQL, MongoDB, Bootstrap, Tailwind, Postman, Chart.js, TCPDF, MVC Architecture, OOP, SDLC, Version Control

WORK EXPERIENCE

Junior Developer

Sept 2025 – Present

Intercommerce Network Services Inc.

Makati City, Philippines

- Optimized a reporting system that previously took up to 5 minutes to generate outputs, reducing generation time to 5–10 seconds (98% improvement) by rewriting the underlying query logic.
- Engineered a full Transfer Notification System for Clark Development Corporation, digitizing a manual paper-based permit workflow into a multi-role web application now actively used by company staff and external business locators.
- Hardened a payment system against duplicate transactions and unauthorized access by implementing session expiry, single-active-transaction enforcement, and role-based access controls.
- Implemented security features across multiple systems including login protection, automatic session expiry, email verification, and file authenticity validation to prevent unauthorized access at all user role levels.
- Maintained 3+ enterprise systems concurrently by resolving bugs, implementing change requests, delivering custom reports, writing unit test documentation for QA & BA, and supporting production issues through ticketing and team collaboration.

Full-Stack Developer Intern

Mar 2025 – Jun 2025

Mentorspire IT Services

Tayabas City, Philippines

- Developed search, filtering, and report generation features for a voter tagging web application, and resolved data integrity bugs causing incorrect records in admin reports.
- Developed digital wallet, player verification, and team management modules for a streaming platform admin portal as part of a collaborative intern team.
- Collaborated in an Agile team environment participating in daily code reviews, weekly sprint planning, and Git/BitBucket version control workflows.

PROJECTS

EduForm — School Management System (Commission)

Jun – Sep 2025

- Built the backend for a multi-role school management system that handles grade recording with auto-computation, attendance and BMI tracking, book and work management, parent conference scheduling, honor certificate generation, and in-app notifications, covering the core needs of school administrators and staff. (Laravel, Sanctum, React, Zustand, Tailwind)

AppliLoan — Appliance Loan Management System (Commission)

Jun – Sep 2025

- Built the backend for a loan management platform with a 3-role system covering loan applications, approvals, interest computation, payment scheduling, QR code payments, barcode-based inventory deduction, and a sales analytics dashboard. (Laravel, Sanctum, React, Zustand, Tailwind CSS)

FinanceFlow — Personal Finance Tracker

Feb 2025

- Built a personal finance web app with wallet, savings, and budget management features, a real-time spending analytics dashboard, and Google OAuth login. (Laravel, Tailwind CSS, Chart.js, Socialite)

BEEMO — IoT Beehive Management System (Capstone)

Aug – Dec 2024

- Built a real-time beehive monitoring system that processes sensor data from Arduino/NodeMCU devices, with an analytics dashboard and automated harvest notifications via email and SMS API. (PHP, MySQL, Chart.js)

EDUCATION

Bachelor of Science in Information Technology

2021 – July 2025

College of Sciences, Technology and Communication Inc. (CSTC)
